The screenshot displays the Krishand Payroll software interface. On the left, there are input fields for 'Mulai Baris Data', 'Mulai Kolom Data', 'Baris Judul', 'Tahun', and 'Bulan'. A red arrow points from the error message to the 'Bulan' dropdown menu, which is set to 'Januari'. The main window shows an error dialog box with the text: 'The expression On Click you entered as the event property setting produced the following error: Subscript out of range.' Below the error message, there are two explanatory lines: '* The expression may not result in the name of a macro, the name of a user-defined function, or [Event Procedure].' and '* There may have been an error evaluating the function, event, or macro.' In the background, a Microsoft Excel spreadsheet is open, showing a table with columns for 'NIK', 'Nama Pegawai', 'GJ', 'TJBT', 'THR', 'UM', 'TR', and 'OT'. A red box highlights the 'Jan' cell in the 'GJ' column, and a red arrow points to it from the error message.
